

## SPECIFICATIONS

Product Description: **AIR TEMPERATURE CONTROLLER**  
Part Number: **9990**  
Style: **VORTEX**

### GENERAL DESCRIPTION:

The Air Temperature Controller adjusts the amount of air to the hood and adjusts air 25 degrees warmer or cooler than the ambient air for use in cold or hot environments. It includes a leather sheath to protect the user from temperature extremes. The Air Temperature Controller requires an air supply pressure range of 55-120 psi.

### TECHNICAL:

Body: Aluminum  
Fitting: Stainless Steel Hansen 1/4" (.63cm) plug  
Belt: Nylon  
Sheath: Leather

### SPECIFICATIONS:

Dimensions: 8 1/8" (20.63cm) long, 1 1/2" (3.8cm) diameter  
Weight: 1 lb, 5 oz (.68Kg) (with belt and leather sheath)

### BENEFITS:

- Uses filtered compressed air
- Provides continuous cold/hot air delivery
- Easy temperature adjustment even with gloved hands
- No moving parts
- Exceptionally reliable
- Will cool or warm compressed air by 25° F
