

SPECIFICATIONS

Product Description: **SAR FLOW TEST KIT**
 Part Number: **9900-40**
 Style: **SUPPLIED AIR**

GENERAL DESCRIPTION:

CFM tester checks the volume of air that gets to the respirator. A flow meter simply quick connects onto an airline hose to check the respirator system for NIOSH compliant air flows. The kit contains flow meter and a full assortment of quick connect plugs and adapters to fit all respirator manufacturer's airline hoses. Excellent for use with breathing air pumps.

NOTE: NIOSH mandates 4 CFM for tight-fitting masks and 6 CFM for hoods.

AVAILABLE:

Qty.	PN	Description
1 ea.	9900-41	0-8 CFM Flow Meter
1 ea.	9000-07	1/4" x 3/8" Pipe Bushing
